

Having spent most of the afternoon on the phone with Sebene Smith in Technical Support, we have been unable to resolve technical issues with FECFile surrounding the filing of a Form 9.

The Form 9 is already late in filing, since the original submission on 9/23 (by fax) was not accepted. The reason the original report was submitted by fax was because we were having technical problems with the FEC website. We were informed of the need to resubmit the report online on Thursday, but did not receive an online password until today.

I will attempt to validate and file this report from home now. If that does not work, I will pursue this issue on Monday, with Sebene's help.
